

Software Engineer Degree Apprentice

We are looking for School Leavers from Cheshire, Wirral, Merseyside, Warrington or North Wales with strong A-Level Maths to take on as Software Engineer Degree Apprentices.

Applicants know they want a career as a Web App Developer. They relish the challenge of building commercial software for 360 Systems clients and studying the theory they are putting into practice during day release to LJMU.

If you have already built some apps or a website outside of the classroom, a BSc Digital & Technology Degree Apprenticeship should be a serious option for you.

BSc Digital and Technology Solutions degree from Liverpool John Moores University

Putting the theory you learn at LJMU into practice at 360 Systems allows you to advance rapidly at University and enhance your career prospects significantly over traditional Computer Science Graduates.

And one of the great thing about a degree apprenticeship is that you'll be earning a salary straight away and have your tuition fees paid over the 4 years of the degree programme.

The LJMU Degree Apprenticeships website has more information on the BSc Digital and Technology Solutions from Liverpool John Moores University.

Software Engineer Degree Apprenticeship

This is a rewarding career path in a challenging educational and work environment.

As a Degree Apprentice, you will follow the same track as our Graduate intake, working with our experienced Full Stack Developers, taking an active part in projects and rapidly improving your software development skills.

We start you off with HTML5, CSS3 and JavaScript for front end development and then C# for the back end server side code. This is the start of our fast track programme to turning you into a commercial web developer using Angular, Material, Microsoft .NET and the Azure Cloud platform.

Responsibilities

- ✓ Learn core development technologies
- ✓ 1st line support for systems, websites and customers
- ✓ Test systems as part of a project team
- ✓ Take on day to day tasks of experienced developers
- ✓ Employ coding best practices in the work you do
- ✓ Create high quality systems
- ✓ Code Front End Web and Mobile Apps
- ✓ HTML, CSS and JavaScript Frameworks
- ✓ Write backend systems in C# ASP.NET MVC

Career Path

As well as writing code, you will gain experience in delivering projects using the latest DevOps methods. You will be involved in requirements gathering with business people through to prototyping, coding, delivery and support. Your analytical approach to problem-solving, strong maths and passion for software development make you an asset to the team.

In return, you will work on a range of interesting projects building websites, mobile applications and web portal systems for our clients in the UK and Europe.

Following completion of the Degree Apprenticeship, you will be a fully fledged Software Engineer with 4 years of commercial experience building bespoke web systems and should be looking at undertaking a Lead Developer Role.

Requirements

- ✓ Strong A-Level Maths
- ✓ Passion for software development
- ✓ Technical projects at home
- ✓ Ideally one or more of HTML, CSS, Javascript, C#, Java
- ✓ Minimum 112 UCAS Points including Maths

Location: Ellesmere Port, Cheshire & Liverpool

Our Ellesmere Port Office is convenient for Liverpool, Wirral, Chester, Warrington or North Wales and day release will be to Liverpool John Moores University.

School Leavers

School Leavers with good maths and technical ability, and who have written a website, app or completed a codecademy or Udemy Software Developer course are very much encouraged to apply.

Salary: £14,000pa plus University tuition fees paid.
